

Information about nitrous oxide

Nitrous oxide (commonly known as laughing gas) is a colourless gas sold in canisters, usually inhaled using a balloon.

This page has been created to help individuals find out more about the substance and:

- ▶ the health risks associated with taking it and where you can get help
- ▶ what the law says
- ▶ what the Council and partners are doing to tackle the issue
- ▶ how to report nitrous oxide canister litter in Solihull
- ▶ how to report a concern that a business or individual is selling the substance in Solihull
- ▶ find help and useful resources
