

APPENDIX 2

Emissions Reduction Pledge 2020 –

Review of actions needed by SMBC to comply

Introduction

Approach requires organisations to sign up to a common set of principles, under the Emissions Reduction Pledge 2020 banner.

Proud partners of the
Emissions Reduction Pledge 2020

Requirements:

- Develop and implement the business case for measuring and reducing energy use, costs and carbon emissions in their organisations
- Implement the ERP 2020, using regular measurement to inform management action
- Report its annual energy use to BEIS through existing reporting mechanisms where possible
- Share best practice in their local area and within sectors

Gathering and Reporting Emissions Data

Estate set – *current reporting systems meet criteria*

Emissions data (previously NI 185)

- Scope 1 – *currently report*
- Scope 2 – *currently report*
- Optional - Scope 3 – *data available for transport emissions – other emissions such as those from landfilled waste optional and we would not choose to report.*

Baseline year – proposed 2009/10 – *since the proposal for a target in the Clean Growth Strategy we have adopted 2009/10 as a baseline.*

Reporting - either

- NI185 format – *we don't report in this format, however we have done and are familiar with it.*
- BEIS template – *it is proposed to adopt the new template, modifying or adding to current reports.*

By 31st October 2019 – *easily incorporated into 2018/19 processes*
