

Appendix A – Response to statutory consultation process

Email Response 1

I am a parent of a child at the school and would strongly support the creation of a resource centre for the identification and catering of SEND children.

I have a daughter with dyslexia who was only identified as having dyslexia at year 10 aged 15 and after I did my own private assessment. She now gets her rightful provision but had missed out on a lot.

I know that such service will open the door to a lot who parents and children.

Kind regards

A grateful parent

Email response 2

Hi to whom this may concern,

I have recently received an email from the school to advise a new building is being built for children who have an ehcp plan and children who have autism and I personally think its a brilliant idea due to my son having been diagnosed with autism last year, I think the children need to have a smaller group and more one to one with the teachers.

I can't wait to see the new changes put in place.
